

### Data formats:

- Vinyl 1,2,5,6: 585 (+ 6 mm) x 285 (+ 6 mm)
- Vinyl 3,4,7,8: 585 (+ 6 mm) x 585 (+ 6 mm)
- Vinyl 9: 285 (+ 6 mm) x 285 (+ 6 mm)
- Vinyl 10: 285 (+ 6 mm) x 585 (+ 6 mm)

These are the formats in which your print data should be created.

### This format includes

3 mm bleed.  
This bleed is created during the production away from us.

Please always place backgrounds and objects falling off the edge of your data formats to avoid white margins.

### Final formats:

- Vinyl 1,2,5,6: 585 x 285 mm
- Vinyl 3,4,7,8: 585 x 585 mm
- Vinyl 9: 285 x 285 mm
- Vinyl 10: 285 x 585 mm

In this format you will receive your finished Print product.

### Safety distance:

3 mm around and 18 mm at the corners  
It is measured from the final format.  
To prevent unwanted bleeds  
of your texts and information by the  
Production and drilling of the holes plus  
the subsequent covering by the clips.

### Allgemein:

Hintergrundbilder, Verläufe und Grafiken sollten unbedingt bis an den Rand des Datenformats angelegt werden, da produktionstechnisch kleinere Toleranzen beim Verarbeiten Ihres Druckproduktes auftreten können.

### Farbmodus:

Der Farbmodus Ihrer Druckdaten muss CMYK sein, andernfalls kann nach dem Druckvorgang ein veränderter, optischer Gesamteindruck entstehen. (Daten im RGB-Farbmodus werden automatisch durch uns in CMYK konvertiert.)

**Dateiformat:** Die Auflösung ihrer Dateien sollte mindestens 300 dpi betragen. Bilder und Grafiken sollten möglichst hochauflösend sein. Wenn Sie Bilder im Maßstab 1:1 anlegen wollen, sollten diese mindestens 72 dpi haben. Sonst kann der Druck verpixelt wirken.

**Ausgabe Format:** Speichern Sie Ihre Dokumente am besten im PDF-Format ab.

Achten Sie darauf, Schriften einzubetten und (möglichst) Transparenzen zu reduzieren.

**Mehrseitige Dokumente:** Senden Sie uns bitte in chronologischer Reihenfolge als eine einzige PDF-Datei.

**Einzeldokumente:** Benennen Sie bitte entsprechend unseren Vorgaben und mit klar zugeordneten Bildtiteln.

Bitte verwenden Sie hierzu immer Ihre

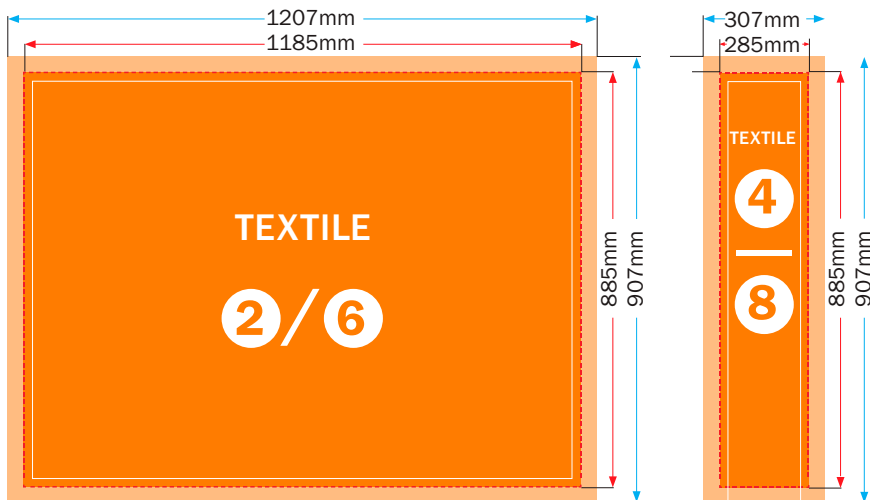

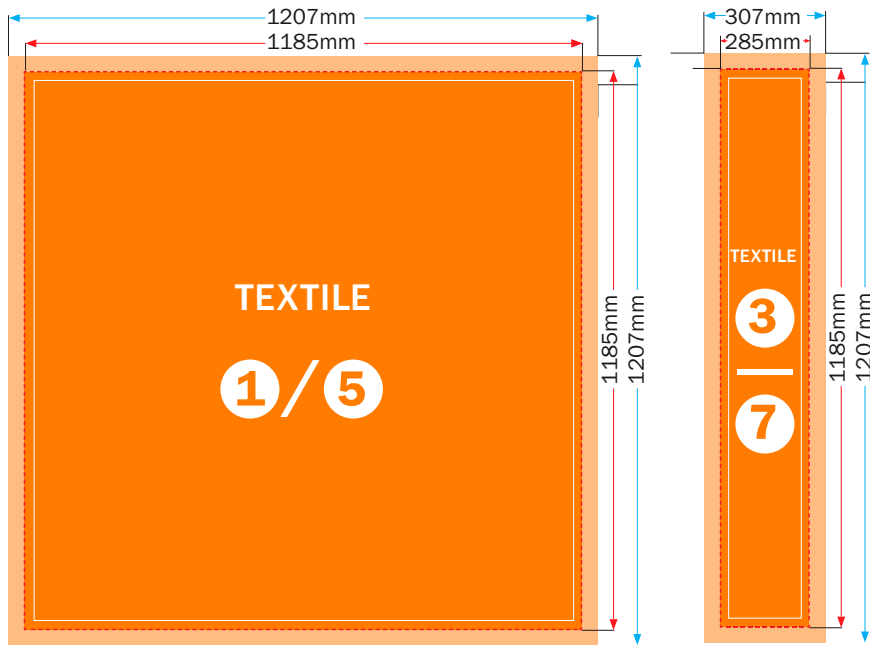

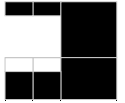

**Bestellnummer - z. B.:**

(order\_111111\_romeo.pdf)

(order\_111111\_romeo\_vinyl\_1.jpg)

(order\_111111\_romeo\_textile\_1.jpg)

etc.

**Data format:** e.g. **1207 x 907** mm

The format in which your print data should be created.

Included in this format are: 11 mm Trimming for the keter and its attachment.

This trim is required for production and is later in the profile groove.

**Please** place backgrounds and edge Objects always up to the border of your data format to avoid white margins.

**Final size:** e.g. **1185 x 885** mm

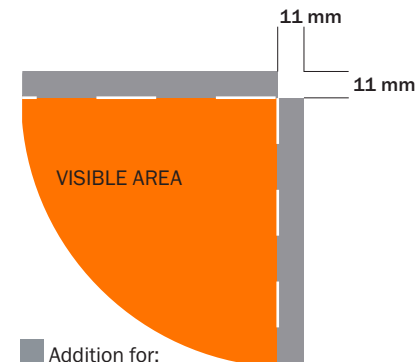

In this format your picture motive is afterwards visible

**Safety distance:**

3 mm (on all sides)

This is measured from the final format and prevents unwanted gating your texts and information during the production.

■ Addition for:  
**silicone + edge waste**  
(not visible area) textile surface

**In general:**

Background images, gradients and graphics should always be created up to the edge of the data format, as smaller tolerances can occur during the processing of your print product.

**Color mode:**

The color mode of your print data must be CMYK, otherwise a changed, optical overall impression can be created after the printing process. (Data in RGB colour mode are automatically converted by us to CMYK).

**File format:** The resolution of your files should be at least 300 dpi. Images and graphics should be as high resolution as possible.

If you want to create images on a scale of 1:1, they should have at least 72 dpi. Otherwise the print may appear pixelated.

**Output Format:** It is best to save your documents in PDF format. Make sure to embed fonts and (if possible) reduce transparency.

**Multi-page documents:** Please send them in chronological order as a single PDF file.

**Please name** individual documents according to our naming and with clearly assigned image titles. Please always use your order number - e.g:

- (order\_111111\_romeo.pdf)
- (order\_111111\_romeo\_vinyl\_1.jpg)
- (order\_111111\_romeo\_textile\_1.jpg)
- etc.
